

- ```
- } : 1197 points.
- > : 25137 points.
```

In the above example, an illegal `]` was found twice ( $2 \times 3 = 6$  points), an illegal `]`  was found once (57 points), an illegal `}` was found once (1197 points), and an illegal `>`  was found once (25137 points). So, the total syntax error score for this file is  $6 + 57 + 1197 + 25137 = 26397$  points!

Find the first illegal character in each corrupted line of the navigation subsystem. What is the total syntax error score for those errors?

Your puzzle answer was 399153.

--- Part Two ---

Now, discard the corrupted lines. The remaining lines are incomplete.

Incomplete lines don't have any incorrect characters - instead, they're missing some closing characters at the end of the line. To repair the navigation subsystem, you just need to figure out the sequence of closing characters that complete all open chunks in the line.

In the example above, there are five incomplete lines:

- ```
- [( { ( ( ( ) ) ) ] ] > [ [ { ] ] { ( < > ] ] - Complete by adding } } ] ] ) } ] ].
- [ ( ( ) [ < > ] ) ] ( { [ < { < [ ] > > ( - Complete by adding ) } > ] } ).
- ( ( ( ( { < > ] < { < { < > ] { [ ] [ ] { } - Complete by adding } } > ] > > ) ) ) ).
- { < [ ] ] > ] < { [ [ [ [ ] ] { ( ) [ [ [ - Complete by adding ] ] } } ] ] > ].
- < { ( [ { { } } ] < [ [ [ < > ] ] ] ] ] > [ ] - Complete by adding ) ] ] > .
```

-): 1 point.
-]: 2 points.
- }: 3 points.
- >: 4 points.

- `}}]]}}]]` - 288957 total points.
- `)>]>]]` - 5566 total points.
- `}}>>>))` - 1480781 total points.
- `]]}}]]>` - 995444 total points.
- `]]>` - 294 total points.

Autocomplete tools are an odd bunch: the winner is found by **sorting** all of the scores and then taking the **middle** score. (There will always be an odd number of scores to consider.) In this example, the middle score is **288957** because there are the same number of scores smaller and larger than it.

Find the completion string for each incomplete line, score the completion strings, and sort the scores. What is the middle score?

Your puzzle answer was `2995077699`.

Both parts of this puzzle are complete! They provide two gold stars: **

At this point, you should [return to your Advent calendar](#) and try another puzzle.
